99.9% pure annealed copper with thick copper strands provide maximum conductivity and durability. Superflex, oil resistant PVC is easy to clean and adds flexibility for easy coiling.

POWERSMART™
VOLTAGE INDICATOR

BLUE POWERSMART LED

Provides instant indication that power is present, dual Powersmart LEDs indicate power is present on each leg. In blackout situations, the LEDs indicate whether a fault has occurred at the power source or at your equipment.

FAULTSMART™
REVERSE POLARITY AND
NEUTRAL LOSS INDICATOR

RED FAULTSMART LED*

Indicates incorrect flow of electricity due to incorrect wiring. Provides instant warning and reduces the risk of hazard or damage to electrical equipment.

**50A, 125V Cords*

CORD SETS

THE PERFECT BALANCE
OF STRENGTH AND DURABILITY

Furrion's cord set offering includes 15, 30, 50A power cords in a variety of lengths and colors. The cord construction perfectly balances the quantity and thickness of copper strands. Thus, they are constructed to withstand harsh pull tests and flexible enough to coil and store with ease. Furrion's Powersmart and Faultsmart technologies provide real time, valuable safety information. All cords meet stringent, global marine standards, providing the boater with peace of mind when connecting to shore.

SMART CORD SETS

SMART CORD SETS FEATURE:

- Super-flex, oil-resistant conduit that is easy to clean and flexible for easy coiling
- Ergonomic, molded side grips provide easy, user-friendly connections
- All cords meet global marine industry standards, Marine UL, cUL, ETL Intertek Certified
- 5-year, quality assured warranty

30 AMP, 125V CORD SETS With Powersmart™ Technology

The Powersmart™ bright blue LED voltage indicator displays real time information that there is power to the cord set. Engineered and tested to withstand harsh environments, Furrion cord sets are ETL Intertek Certified, meet Marine UL and other global marine industry standards. Cord sets are available in two colors, titanium grey and yellow.

YELLOW CORD SET

Features:

- Constructed for durability, strength and longevity in the marine environment, flexible for easy coiling and storage
- Ergonomic, molded side grips for easy connection
- 12-foot cord sets include storage bag
- Universal fit with other brands (NEMA)

CORD SET ACCESSORIES

CORD ORGANIZER BAG

Furrion's shore-power organizer bag is the ideal place to store your cord sets and shore-power devices to keep them dry, clean and accessible. Constructed with heavy-duty materials, it provides weather-resistant protection.

Features:

- Cable entry and exit holes at each end of the bag for easy access
- Ventilation for drying moisture
- Heavy-duty, water-resistant material to help prevent damage and provide added security and strength
- Reflective edges that make the bag visible in dark locations

FORGBG-SS

Scan the QR code to watch the Furrion portable cable ramp in action

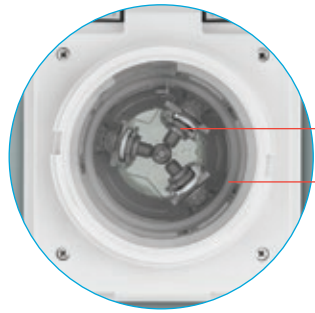

PORTABLE CABLE RAMP

Furrion's portable cable ramp has amazing industrial strength, is lightweight and packs into a small bag for easy storage and portability. With its adjustable sizes and the ability to join several ramps together, it provides protection for a wide variety of applications. The portable ramp has also been designed for permanent mounting when needed.

Features:

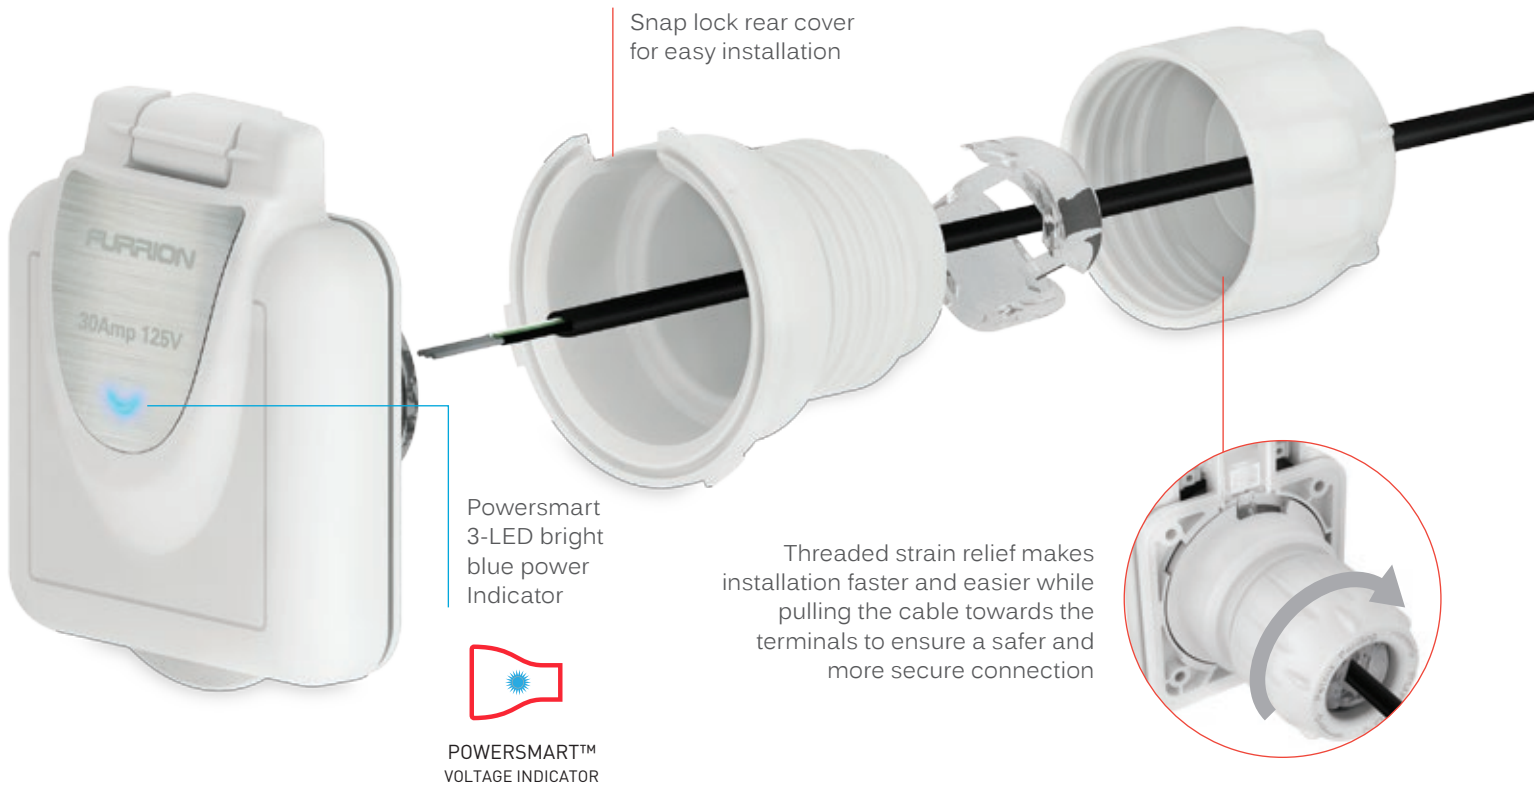

- Adjustable widths for different sizes
- Compact storage bag included for easy storage
- Reflecting surface symbols for night visibility
- Rubber feet for added traction and ramp stability
- Length of ramp is 22"
(Join ramps together for additional lengths)
- Cable channel width is adjustable from 2" to 3.75"

Innovative terminal design provides 50% more screw thread and reduces operating temperature by up to 10° F. Secure cable with more torque and reduce cross threading during installation

Transparent pin face provides the user with quick indication that the cable is secured to the terminal and provides visible warning for overheating connection or internal damage

Snap lock rear cover for easy installation

Powersmart 3-LED bright blue power Indicator

Threaded strain relief makes installation faster and easier while pulling the cable towards the terminals to ensure a safer and more secure connection

POWERSMART™
VOLTAGE INDICATOR

POWER INLETS

MODERN, SLEEK DESIGN
MEETS EXCEPTIONAL
FEATURES & FUNCTIONALITY

Furrion marine power inlets are engineered for safety and constructed for durability and longevity in the harsh marine environment. These stylish inlets feature a unique terminal design reduces operating temperature by up to 10° F. An innovative strain relief that makes installation simple and secure, and a bright blue Powersmart LED to indicate a live connection. Available in 30A and 50A models, all inlets meet stringent, global marine standards.

**Stainless steel inlet does not include LED*

30 AMP POWER INLETS

With Powersmart™ Technology

Engineered for safety and longevity, the feature-rich Furrion inlets are an ideal solution for a wide range of boats. Constructed with marine grade materials to withstand harsh environments, Furrion inlets feature NEMA universal fit, are ETL Intertek Certified, and meet other global industry standards including Marine UL, CE and ABYC. Powersmart™

technology informs the boater of normal and abnormal conditions. Designed for style with clean lines, luxurious, strong materials, and functionality that simplifies installation and ease of use. Available in white, grey, stainless, square or round to meet your aesthetic needs. Furrion inlets power living luxury onboard.

PIGTAIL ADAPTERS

With Powersmart™ LED Technology

Marine pigtail adapters are used to convert plug sizes. Furrion pigtail adapters are made to stringent quality standards, constructed with high-grade, corrosion resistant materials for longevity in the harsh marine environment. Designed for safety, Powersmart™ or Faultsmart™ indicators provide valuable, real-time information. Plug-ends feature ergonomic side grips

for easy, user-friendly connection. Furrion adapters meet global industry standards, NEMA universal fit with other brands, cables are rated up to 600V, 105°C, and a bonus sealing collar is included with all pigtail adapters except for FP1530SY. Furrion stands behind its shore-power products with a 5-year warranty. 50A adapters include heavy-duty storage bag.

AC & DC TELEVISIONS

DESIGNED TO ENTERTAIN, BUILT TO MOVE

Furrion's world-class televisions provide optimal performance while withstanding the vibration felt on the open water and exposure to extreme temperatures. Features of the ultra-slim LED televisions include: full 1080P high definition viewing, a beautiful A+ vivid panel, efficient LED technology for added brightness, enhanced audio amplifiers and speakers, Dolby Digital® sound, and a wide range of connectivity options for your console or DVD needs. Combining advanced Vibrationsmart™ and Climatesmart™ technology, durable construction, connectivity and style, the LED HD TVs from Furrion offer state-of-the-art entertainment onboard.

DESIGNED AND TESTED FOR ONBOARD APPLICATIONS

Furrion's audiovisual electronics, including HD LED televisions feature advanced technology, deliver world-class performance, picture and sound quality, and enhance your onboard entertainment experience.

1. METAL PLATING FOR EXTRA DURABILITY

The unique design provides a strong and durable housing for electronic and wall mounting components

2. METAL WALL MOUNT BRACKETS

The heavy-duty wall mount brackets are fixed directly to the metal framing. This balances the vibration force between the metal components and reduces pressure in areas prone to damage

3. VIBRATION RESISTANT CIRCUIT BOARDS

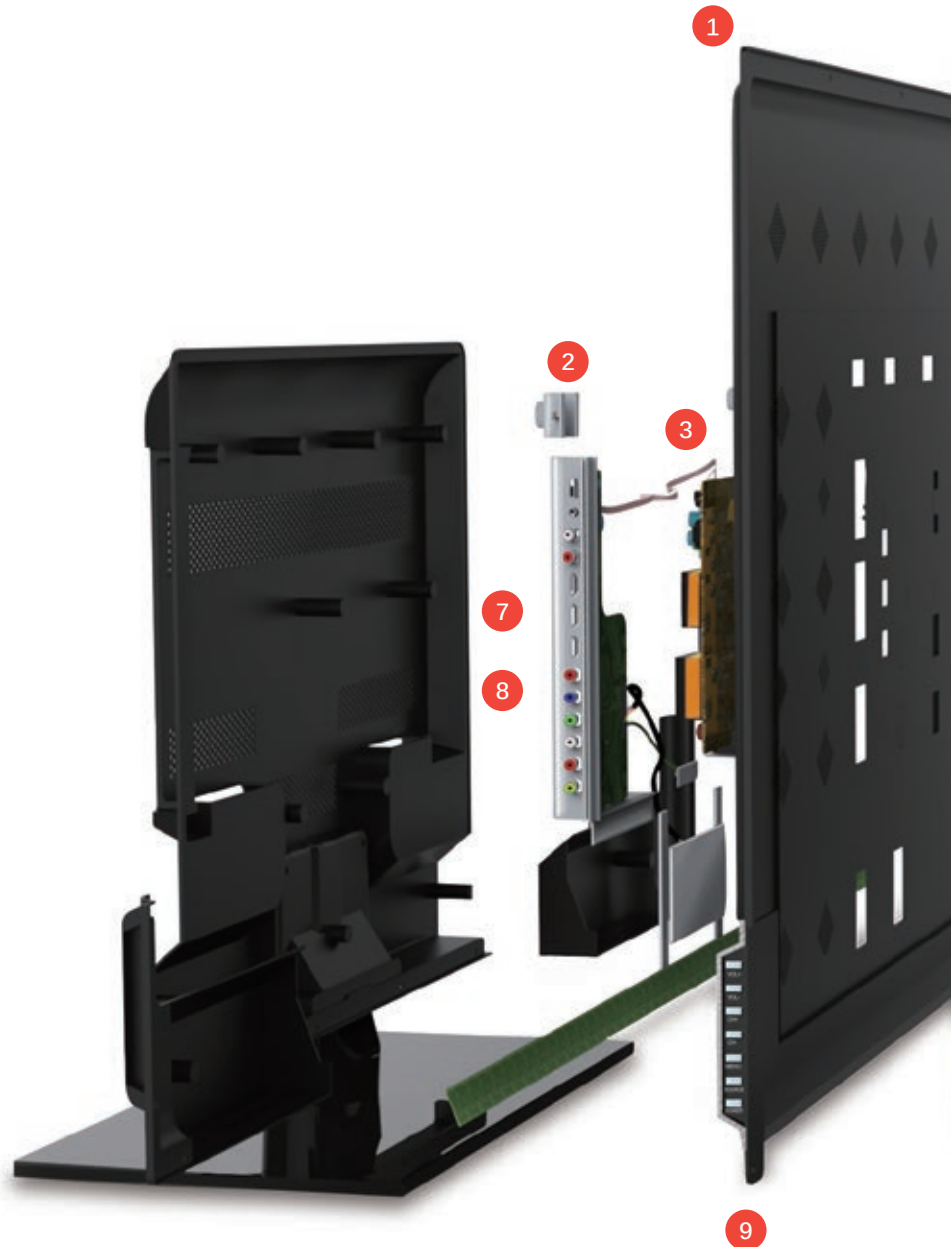

Silicone glue is used to protect the circuit board components from stress caused by vibration. The same process is used in mobile phone technology for shock absorption

4. ENERGY EFFICIENT HIGH BRIGHTNESS

Combining LED technology with energy efficiency to allow for crisp, clear viewing with minimal power consumption

5. BEAUTIFULLY VIVID A+ PANEL

Providing the highest quality viewing experience with error-free resolution

SEE IT PUT TO THE TEST FOR YOURSELF
Scan the QR code to watch the Furrion TV
outperform other brands during vibration testing

6. UPGRADED FURRION AMPLIFIER AND SPEAKERS

Providing high-quality audio for an optimized cinematic experience

7. HDMI 1.4

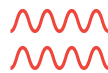

HDMI 1.4 features the latest digital advances to connect your high definition video devices: Full HD 1080P+ high definition video, ultra-high speed digital and audio cable with high purity copper conductors and durable gold-plated connectors for maximum signal transfer

8. AUDIO OUT

With audio out, plug your headphones or speakers directly into the TV's port to amplify or direct your TV's audio

9. SIDE OR BOTTOM ACCESS CONTROLS

Easily control your TV's functions from the main console

FURRION GALLEY APPLIANCES

LIVING LUXURY ONBOARD

Equipped with Vibrationsmart™ and Climatesmart™ technologies, the galley appliances are engineered and constructed to withstand vibration and extreme temperatures. Designed for performance in the marine environment, power draw and water usage are kept to a minimum. Furrion has developed cooking technologies to simplify and expedite the cooking process that are designed for use while in motion. Let the sleek style, functionality and performance of Furrion galley appliances inspire you to create your own dream galley. A galley that makes cooking effortless, a place where you, your family and guests can enjoy living luxury onboard.

VIBRATIONSMART™

CLIMATESMART™

DUAL BURNER INDUCTION COOKTOP

With the intuitive and innovative Loadsmart™ power management system, Furrion's induction cooktops balance optimal performance, safety, functionality and convenience. The magnetic induction technology directly heats cooking devices, rapidly increasing temperatures in a short time. Thus, boaters can cook with less time, less energy and more precision.

Features:

- Timer: up to 180 minutes with hold touch settings
- 11 temperature control settings
(Temperature range: 150-450°F)
- LED temperature display
- 13 Amp maximum draw, power sharing
- Automatic safety shutdown
- Sleek and smooth surface for easy clean-up
- Childproof lock
- Stay In Place Pan Holders available to keep pans stable while cooking #424830 (Sold separately)

Loadsmart Dual Burners

The intuitive power management system balances load between each zone

Sensor Touch Control

Conductive controls make operation quick and easy

Digital LED Display

Digital temperature display for precise cooking

Auto-Pan Detection Safety

Induction zones automatically switch off when no pan is detected

FURRION

LIPPERT
COMPONENTS®

MARINE CATALOG

ABOUT LIPPERT COMPONENTS

Lippert Components, Inc. (LCI®), a subsidiary of LCI Industries (NYSE:LCII), supplies a broad array of components for the leading manufacturers of recreational vehicles; buses; trailers used to haul boats, livestock, equipment and other cargo; trucks; pontoon boats; power and sail boats; manufactured homes; and modular housing. LCI's vast product offerings range from steel chassis and axles to interior components including furniture and appliances as well as an array of electronic equipment including LED televisions, sound systems, wireless backup cameras and more.

In 2016, LCI celebrated 60 years of business. LCI's current CEO, Jason Lippert, is the third generation of the founding family to run the business. The now \$1.7B publicly-traded company has maintained its family heart and soul. The company's core values: passion for winning, team play with trust, honesty, integrity and candor, caring about people and positive attitudes prevail with a committed staff that pushes for product innovation, business growth and an outstanding customer experience.

In the summer of 2015, LCI officially entered the marine marketplace. LCI acquired Signature Seating, a custom upholstered furniture company based in Fort Wayne, Indiana that primarily manufactures customized pontoon boat furniture. In addition, LCI entered into an exclusive distribution partnership with Furrion®, a Hong Kong-based manufacturer of shore-power solutions, galley appliances, audio products, and shock and vibration resistant televisions. In January 2016, LCI expanded its custom furniture capabilities, acquiring the furniture division of Nautic Global Group, Highwater seating and canvas. In October 2016, LCI acquired certain assets of the seating and chassis division of Atwood Mobile Products, further solidifying the company's stake in the marine seating business.

For more information on Lippert Components and its marine strategy, scan the QR code to view the complete interview with CEO, Jason Lippert.

CUSTOM FURNITURE

With more than 35 years of experience manufacturing furniture for the marine industry, our well-versed engineering, R&D and design labs consistently provide high quality products and continuously introduce thoughtful innovations to the market. Utilizing customer input and our team of knowledgeable industry professionals, we offer creative and diverse solutions for the marine lifestyle.

CONSTRUCTION

Lippert furniture and seating is manufactured in the U.S. A vertically integrated company, Lippert facilities have the ability to rotationally mold plastics, custom upholster with Gerber, CNC and custom quilting machinery on site. Advanced manufacturing and assembly techniques ensure high quality products and timely delivery.

How we construct our products:

- Polyethylene or e-coated steel frames for longevity, durability in the marine environment
- Premium quality vinyl that is UV and mildew resistant
- Virgin, mildew-resistant, polyurethane foam with protective plastic film
- Aluminum hinges with stainless steel pins and external fasteners made of corrosion-resistant zinc or nickel plating
- Bonded polyester thread, color fast, UV-resistant
- High quality upholstery and Innovative quilting
- Active quality control, vertically integrated manufacturing

CUSTOM PLASTIC PARTS

Lippert's rotational molding facility has the ability to develop and create custom parts. With state-of-the-art machinery and processes, our team can deliver high-quality parts designed for longevity in harsh environments.

SEATING FRAME SOLUTIONS

With our corrosion-resistant e-coating process, our steel fabricated frames provide structure, performance, suspension, comfort and longevity in the marine environment. All of our frames have met rigorous independent testing and meet global industry standards.

DESIGN & MANUFACTURING

The Lippert Components team offers decades of expertise in the design, development, construction and manufacturing of a broad range of seating and furniture solutions for the marine marketplace.

CAD

Our designers utilize the latest in Computer-Aided Design software to produce 3D models and perform finite element analysis.

PATENTED DESIGNS

Dedicated and experienced engineering staff focusing their expertise on application solutions, resulting in the issuance of several U.S. and International patents.

ROBOTIC WELDING

Our robotic welders are specifically designed to minimize cycle times, fixture change-overs and to provide weld consistency.

E-COAT & POWDER COAT FINISHING

Each seat frame is washed to remove debris and oil left over from the manufacturing process. An e-coat or powder coat finish is then applied in our specially constructed booth with regulated temperature and humidity for a superior quality finish.

IN-HOUSE PRODUCT TESTING

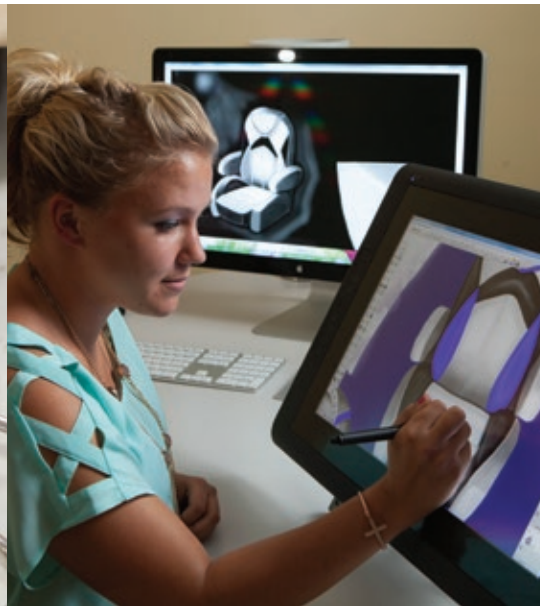

We provide extensive, in-house testing capabilities for most applicable FMVSS, ANSI and SAE requirements. We can take you through the entire process including design, development and testing of your seating solutions.

ROLL FORMING

Roll forming produces consistent and uniform bends, critical to the overall performance of seat track systems.

CNC LASER CUTTING & AUTOMATIC TUBE CUTTING

Our CNC laser cutting machine and tube bending interfaces with computer aided drawings for quick turnaround of prototypes and short run components. With automatic loading capabilities, our tub cutting machine reduces set-up time and cuts multiple tube lengths.

Black Ice™

BLACK ICE™

Black Ice is an innovative new sun-reflective black vinyl that is up to 24 degrees cooler than traditional black vinyl. It maintains the same temperatures in direct sunlight as earthtone vinyl colors onboard the boat. Black Ice can be used on a wide variety of furniture, which we refer to as Blackout Furniture Package™.

I-COOL®

I-Cool is a gel foam that lowers the temperature of the furniture approximately 2 degrees on average. I-Cool technology may be added to the foam used in the manufacturing of Lippert Furniture, offering improved comfort onboard.

Platinum Series

TRANSFORMATIVE FURNITURE

Lippert's transformative furniture is designed to maximize space and functionality to enhance the boating experience. Engineered for ease of movement, comfort and durability, each of Lippert's custom transformative furniture solutions

solves the space equation without compromising quality, style or reliability. Offering privacy in small spaces, additional sleeping areas and more comfort, Lippert has the ability to customize transformative furniture for your boat.

TUMBLER SEAT

The unique Tumbler Seat provides the option of a face to face, back to back or flat lounge seat, offering versatility onboard. Constructed with durable, UV and corrosion-resistant materials for longevity in the marine environment. This seat can be customized to fit specific vessels. In addition, the aesthetics of the seat including vinyl, stitching, quilting, embroidery and more can provide a unique look for your boat. Patent pending.

AS SHOWN:

In horizontal position: 89" W x 53" D x 26.5" H

Floor to sleeping surface: 18"

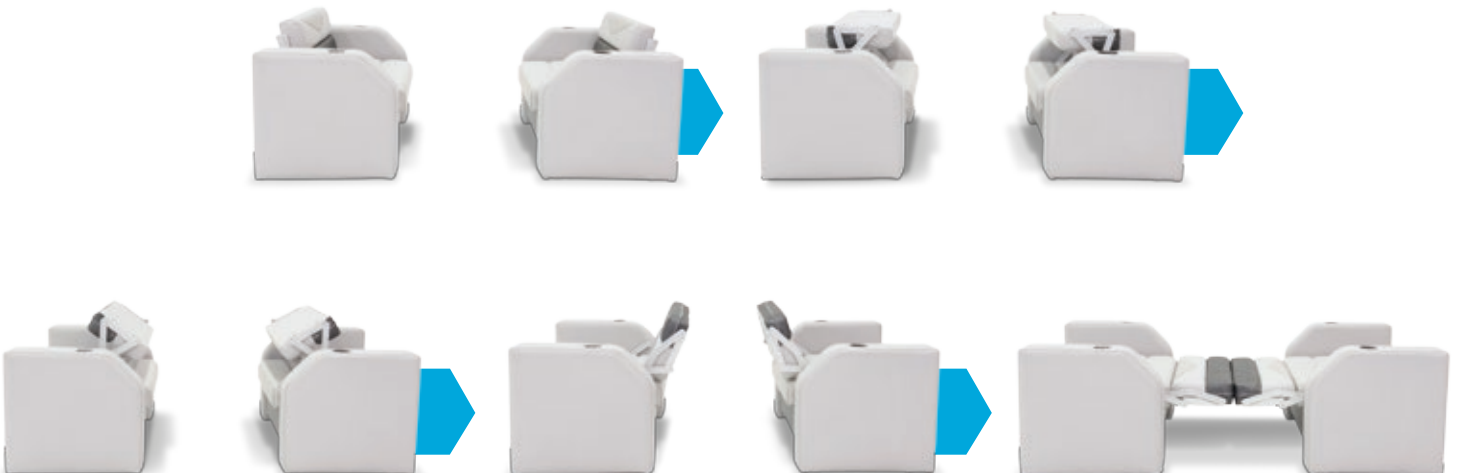

Individual seat dimensions:

30" W x 53" D x 31.5" H

MARINE DESTINATION SOFA

The Marine Destination Sofa, offers the boater additional sleeping space onboard. With its patented mechanism, the furniture easily transforms from a sofa to a full, comfortable bed. The look of the furniture can be customized to fit the design aesthetic of the boat whether in a galley or saloon. The destination sofa mechanism is available in 46", 56", and 60" finished lengths. The shape of the seat and the aesthetics including vinyl, stitching, quilting, embroidery, and more can provide custom transformative seating for your boat. Patent pending.

AS SHOWN:

In horizontal position: 57" W x 72.5" D x 14" H

In seated position: 57" W x 33" D x 28" H

Floor to sitting surface: 15.5" H

Arm rest only: 30.5" W x 11" (Rear) - 12" (Front) H x 2" D

PLATINUM SERIES
REPLACEMENT PONTOON FURNITURE

QUALITY WORKMANSHIP. UNSURPASSED COMFORT.

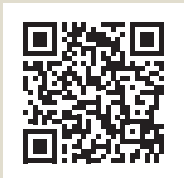

With more than 35 years of experience building marine furniture for leading pontoon boat manufacturers, our skillful engineering, R&D and design labs have developed replacement pontoon furniture that is stylish, comfortable and constructed for durability, strength and a long-life span in the harsh marine environment.

With 23 items available in three monochromatic, neutral vinyl options, the Platinum Series offers furniture solutions for a wide range of boating needs.

CONSTRUCTED FOR COMFORT, DURABILITY & LONGEVITY

PLATINUM SERIES CONFIGURATOR APP

To streamline the configuration and purchasing process, and eliminate the guessing game of what will fit on a particular vessel, LCI recently introduced its Platinum Series Configurator app. When you enter the site, it asks for the length and width of your boat then creates a blank canvas. By accessing a menu, users can drag, drop and rotate the Platinum Series furniture to develop the ideal floorplan for their size boat and boater behavior. When complete, choose the desired color and the app creates a PDF that includes a drawing of the configuration and a list of the part numbers, descriptions and quantities needed to achieve the desired floorplan. The user can then save, print or email the PDF and purchase the furniture.

Features & Benefits:

- **FRAME:**
Rotationally-molded, marine grade polyethylene frame, designed to resist warping with thicker polyethylene walls, added support and unique molding lines
- **STORAGE:**
Large dry storage area under hinged seats, live well ready compartments, channels built into the bases assist with drainage
- **COMFORT:**
Multiple foam densities provide support and comfort. Furniture depths and heights are sized for comfort onboard.

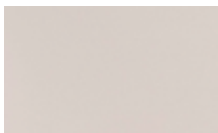

- **CORROSION RESISTANCE:**

- Aluminum seat hinges
- Stainless steel staples & mounting fasteners

- **VINYL & FOAM:**

- Premium marine grade vinyl
- Mildew, UV resistant laminated vinyl
- Bonded, polyester, color fast, UV-resistant threads
- Mildew resistant polyurethane foam

- Three dynamic monochromatic color offerings based on colors used by leading OEM builders today – dove grey, beige & white

Dove Grey

CANVAS SOLUTIONS

DURABLE PROTECTION FROM THE ELEMENTS

LCI offers a broad range of canvas solutions the marine market. The assortment includes mooring covers, playpens, bimini covers, seat and furniture covers, enclosures and changing rooms in a variety of colors. LCI canvas products feature waterproof construction utilizing engineered materials that resist mold, mildew and UV rays and remain colorfast. For longevity in the marine environment, canvas products are double-edge, and reinforced in areas vulnerable to wear and stress. The stainless steel, anodized aluminum and polyethylene fasteners resist corrosion.

LCI canvas solutions are custom tailored, patterned for reliability, and attention is paid to integration and easy installation on the boat.

Features

- Patterned for reliability, custom tailored for each boat type
- Use engineered fabrics designed for sun exposure (solution dyed polyesters and Sunbrella), variety of colors to match owner interest
- Solution dyed polyester and acrylic
- Waterproof, double edged for increased durability, reinforcement in areas to reduce wear and stress, boat attachment and integration is key to fit
- UV, mold, mildew and colorfast resistant
- Stainless steel, aluminum and plastics fasteners for corrosion resistance
- Minimum order quantity crate shipping: 20 PC
- 3-year warranty
- Made in the USA

Mattresses are delivered compressed and rolled for easy installation

MATTRESS TECHNOLOGY BY DENVER MATTRESS

A RESTFUL SLUMBER AWAITS

Denver Mattress® marine mattresses offer boaters a healthy, comfortable and restful sleep experience onboard. Constructed with plant-based foams and natural materials, the flame retardant mattress range includes 5", 9" and 11" depths. The product line includes several standard marine sizes, and custom sizes are available with a minimum order of 10 units. In addition, Lippert's Denver Mattress marine collection includes mattress pads, pillows and sheets.

Features

- Made with luxurious and environmentally-friendly, soy-based BioFlex Foam
- Top 6 mattress brand by customer satisfaction (*Consumer Reports*)
- Denver mattresses offer support and comfort layers to eliminate shoulder, hip and back pain as well as supporting pressure points and proper spinal alignment
- Available in a variety of sizes made to perfectly fit, customization capabilities
- Custom size mattresses available when minimum order quantities are met
- Highly efficient manufacturing process, minimal waste
- 99% recycled steel coil units
- Fire prevention regulations met with natural materials
- Natural rayon fire barriers
- Made in the U.S.A.
- 5 to 10 year non-prorated warranty

DENVER MATTRESS DISPLAYS

Display the Denver Mattress in your marine or boat dealership or retail store with our Denver display racks.

Features:

- 2 mattress models, 28" x 18"
- 2 pillows, 28" x 20"
- 4 packaged sheet sets/pillow case sets/protectors, any combination of four
- Sheet set fabric swatches, 10" x 10" samples with identification cards
- Mini mattress pads and protectors, 28" x 18" samples can be demonstrated on mini mattresses

SHEET SETS

Our sheet sets include: fitted sheet, extra-long top sheet and 2 pillow cases.

Sateen Sheet Sets:

- 100% cotton, 300 thread count
- Luxurious sateen weave
- Fits mattresses up to 14" deep
- 1 year warranty

Microfiber Sheet Sets:

- Ultra-soft brushed microfiber
- Fits mattresses up to 11" deep
- Heavy-duty elastic perimeter for stay-put fit
- 1 year warranty

Adjustable Sheet Sets:

- Ultra-soft brushed microfiber
- Adjustable drawstring fits unique mattress sizes
- Fits mattresses up to 6" deep
- 1 year warranty

MATTRESS PADS

Features:

- 100% cotton, 350 thread count cover
- Adds 2" of plush polyester down-alternative fill
- Spandex skirt fits mattresses up to 16" deep
- 5 year warranty

PILLOWS

Features:

- 100% cotton, 350 thread count cover
- Hypoallergenic polyester down-alternative fill
- Machine washable and double stitched for durability
- 2 year warranty

GLASS

Our glass fabrication facilities also produce glass for entry doors, cabinet doors, backsplashes and windshields for a variety of industries. We offer a diverse arrangement of options when it comes to custom glass printing including high-resolution color printing, popular backsplash designs and real-life images. Our specialized glass printer can

create replications of marble, granite, and ceramic, which is then used to replace the time-consuming process of installing traditional backsplashes. Once applied to the glass, the ceramic inks are baked into the glass with our tempering process to create a very durable and permanent image on the glass surface.

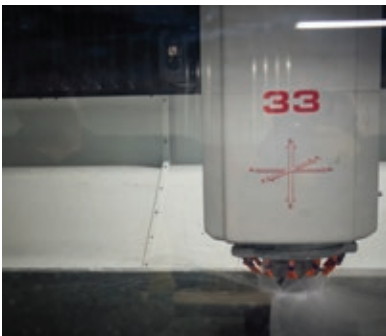

Facilities

Lippert has two prominent glass fabrication facilities in Goshen, IN. Our glass fabrication facilities offer a variety of capabilities including glass cutting, edging, ceramic printing, fabricating holes, and tempering. Between our two glass fabrication facilities, we currently produce approximately 125,000 pieces of tempered glass with additional capacity available. The tempering process is closely monitored to ensure compliance with industry regulations. Each facility has implemented initiatives that focused on improving the work environment, creating efficiencies and manufacturing the highest quality products.

Glass Printing Capabilities:

- Machine: DipTech Digital Inkjet
- Size limits: 65" x 48"
- Print resolution: 360 DPI
- Print thickness: 10um-40um (40um no light transmission)
- Mounting options:
 - Clear drying glass adhesive (Example brand: SIKA)
 - Standoffs (requires holes drilled in glass)
- Minimum order quantity crate shipping: 20 PC

The process for new printed glass development begins with a high resolution photo image or design. Once received, prototypes are created and quotations generated for approval. Final adjustments are then made and production begins.
