GASOLINE/DIESEL-INBOARD STERNDRIVE ENGINE OIL RANGE

From petroleum based to full synthetic, Sierra has the correct engine crankcase oil to match the needs of your gasoline or diesel inboard or sterndrive engine. Sierra offers a full line of direct replacement weight oils that are specifically blended to protect your engine in the harsh marine environment and the extreme load conditions that your engine is subjected to every time you push down on the throttle. Unlike automotive engine oils, Sierra oils are specifically designed to prevent moisture and corrosion from harming your engines internal components. Best of all when you choose Sierra engine oil, you can feel confident that our marine specific oils are backed by the Sierra's Industry Leading Warranty. Remember when it comes to oil you do have a choice, so choose Sierra!

GASOLINE - OUTBOARD ENGINE OIL - TC-W3 (2-STROKE OIL)

Sierra Premium Blue TC-W3 is the right choice for carbureted and EFI engines.

Sierra Direct Injection TC-W3 has been specifically designed to meet the needs of today's high-tech direct injected engines (DFI) like Mercury Optimax®, Yamaha HPDI® and Johnson/Evinrude Ficht® and DI motors. Sierra's Direct Injection is a synthetic oil that will protect your engine in the most demanding marine conditions.

Sierra Full Synthetic TC-W3 has been designed for use in all outboards including Johnson/Evinrude E-Tec®. So when you want the ultimate protection for your engine, Sierra Full Synthetic is there to handle the job.

GASOLINE - OUTBOARD ENGINE OIL - FC-W (4-STROKE OIL)

Today's 4-stroke engines burn cleaner and run quieter than their 2-stroke counterparts. But unlike your car, the demands on a 4-stroke outboard require very special oils and oil additives. All Sierra 4-stroke outboard engine oils meet the same tough standards as the OEM engine oil and are FC-W certified by the NMMA, just like the OEM engine oils. Sierra offers many weights and blends of 4-stroke outboard engine oil to meet your particular situation. And just like every quality product that Sierra makes, our outboard engine oils are backed by Sierra's industry leading warranty.

GASOLINE - CATALYST COMPATIBLE ENGINE OIL

Our NMMA FC-W catalyst compatible engine oils have been specifically designed to meet the unique requirements of modern 4-stroke recreational engines with or without catalyst emission systems. Approved for all outboard, sterndrive and inboard 4-stroke applications, Sierra catalyst oil exceeds all 4-stroke requirements including FC-W and FC-W catalyst compatible. Capitalizing on "ZDDP" anti-wear additive technology to prevent phosphorus depletion and extend emission catalyst life.

Sierra brand gear lubricants are specifically formulated to perform in the marine environment and no matter what you own, chances are Sierra has a gear lubricant for you.

Sierra Premium, Hi-Performance Synthetic Blend and Full Synthetic Lube are all GL-5 rated to provide maximum protection under extreme pressure and meet or exceed the requirements of all major OEM engine manufacturers.

Sierra Type C gear lubricant is only for use in older OMC outboard and sterndrive engine applications that are equipped with electric shift.

All Sierra gear lubricants contain additives specifically manufactured for the marine environment. Sierra gear lubricants will keep water suspended longer than the leading OEM supplier. With our full range of gear lubes, no matter what type of engine package you own, Sierra has the lube for you!

Sierra offers a full line of support products to keep your engine and your boat in top operating condition.

Sierra Marine Engine Oil

Sierra offers the widest variety of oils on the market to match your engine's needs including 4-stroke, 2-stroke, gear lubricant and engine grease.

All oil is not created equal, and it's vital to recognize and understand the differences. Sierra NMMA certified marine engine oils have been developed to meet the specific lubrication needs of marine engines operating under unique and challenging environmental conditions.

This includes the development of specialized additives designed to inhibit corrosion and moisture and protect engine surfaces in a watery world.

Sierra oil and lubricants are blended to the same high standards as the OEM oils and meet the same FC-W and TC-W3 certification standards. Sierra offers specific oils for your brand of engine, not a "one size fits all" product.
